

# Unifont 1.0

Vancete.NET

Contact: [vancete07@gmail.com](mailto:vancete07@gmail.com)

Add icons to your application and forget about quality problems, in less than 700kb Unifont lets you to use more than 2200 vector icons that will be rendered sharp in ANY size.

## Usage

Apply the Unifont to your UI Text GameObject.

Choose an icon from the Cheatsheet (copy it and paste into the Text GameObject) or use the method to apply it.

Enjoy!

Several demo scenes are included.

## Methods

`Unifont.FindByName(string name)`

Returns the icon string equivalent to it's name (find the name in the cheatsheet, excluding 'unifont-')
